

Composting – a complete guide

Anuradha

Nitya Jaivika

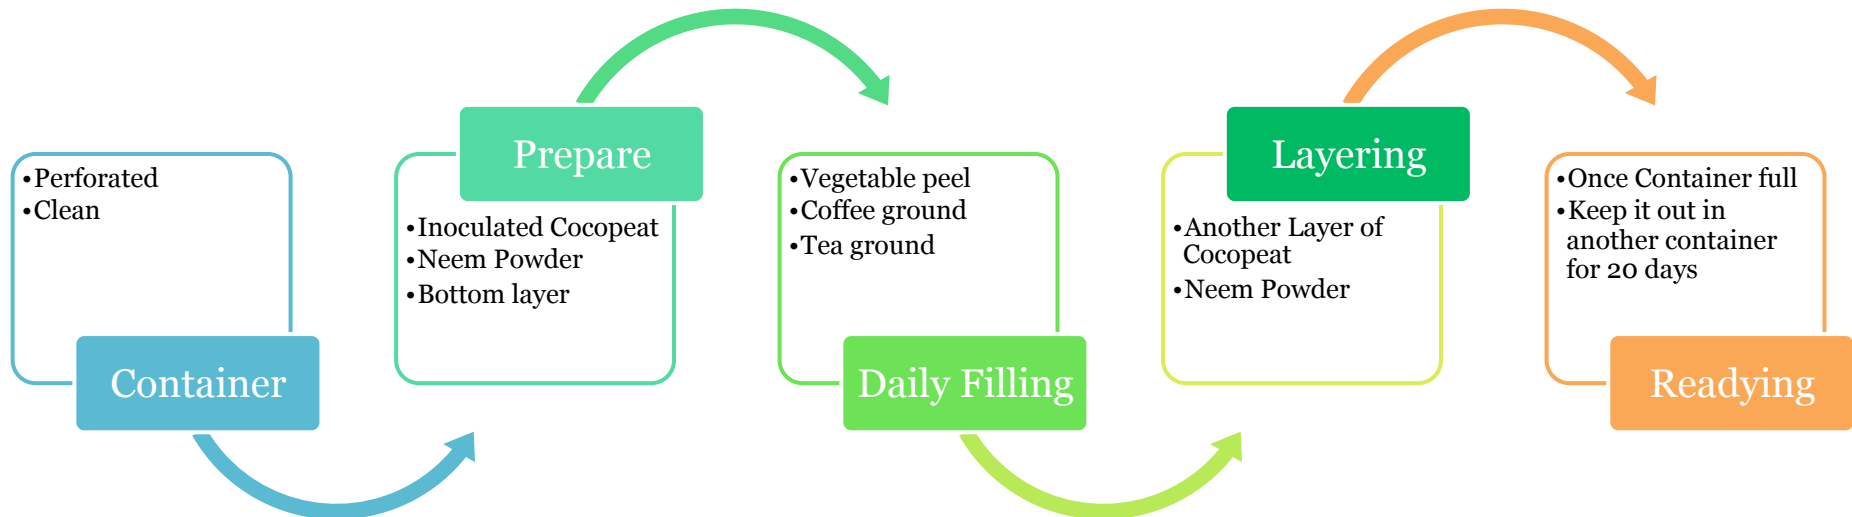

Composting Overview

- Home Composting
- Goals of composting
- Method

Composting

- No stirring
- No dilution
- Just Layering
- Fill it – shut it – ready compost in 20 days
- Can be done easily and indoors

Composting Kit

1. 16ltr bucket with 8mm holes
2. 5kg innoculated cocopeat + neem powder + Spinach, Coriander Seed pouches

Wet waste

1. Vegetable peel
2. Coffee grounds
3. Tea grounds

Step1 - Filling

1. Fill bottom of container (4-5") with cocopeat
2. Add wet waste
3. Cover wet waste with another layer of cocopeat

Step2 - Processing

1. Continue step1 till the container gets full
2. Keep it aside for 20 days

Step3 - Compost

1. After 20 days – composting process is through
2. Wet waste + cocopeat = compost
3. Can be used as ready soil-less pot mix

Don't:

1. Don't use wet cocopeat
2. Wet waste should not drip water
3. Don't expose the container in rain

Thank you very much
Happy composting
